

WANT TO RUN YOUR BUSINESS MORE SUSTAINABLY?

BETTER QUALITY WITH LESS WEIGHT AND FEWER RESOURCES

Discovery paper is lighter and greener. It uses less wood than standard 80g.m⁻² to produce the same amount of paper while avoiding waste.

OUR PAPER HAS A LIFE BEYOND THE OFFICE

In Europe, virgin fibres are able to be recycled, in average, 3 to 4 times. With Discovery fibres we improve the paper recyclability life by 60% up to 150%.

CAPTURING CO₂ ONE REAM AT A TIME

Do you know that our renewable forests are capturing CO₂ all year round?

EU Ecolabel:
PT/011/002

DISCOVERY™

Eco-efficient Paper

DID YOU KNOW THAT
GRAMMAGE IS
IRRELEVANT WHEN IT
COMES TO PRINTING
PERFORMANCE?

WHAT REALLY MATTERS
ARE STIFFNESS AND THICKNESS.

NONSTOP PERFORMANCE

Our *Eucalyptus globulus* fibres are the secret to create a lightweight paper with greater bulkiness, thickness and stiffness than most standard 80g.m⁻² papers.

OPACITY

WHITENESS

=

PRINTING QUALITY

No showthrough

Printing information, graphs and images will be extremely legible on both sides.

Printing results

Higher whiteness and brightness allows more vivid color and high definition contrasts.

THICKNESS/STIFFNESS

+

SMOOTHNESS

=

PERFORMANCE

Runnability

A more dense and rigid paper is less likely to curl and jam.

Optimized surface

Superior tactile sensation, optimized ink and toner consumption and extended office equipment lifetime.
